

IMMUNITY ENHANCER For Your POULTRY

WE-CID

PROVEN ACIDIFIER COMBINED WITH ELECTROLYTE ACIDIFIER AND VITAMIN C

WE-CID ensures the growth of poultry birds and reduces the increase of pathogenic bacteria in the gastrointestinal region. One of the major purposes of using WE-CID is to improve growth performance and better the profitability in poultry production. Organic acids have multi usages in poultry feeds as they help in preservation to control microbial growth, reduction of the feed buffer capacity, inhibition of pathogenic bacteria and betterment of nutrient digestibility. It maintains low gastric pH which activates enzymes to enhance protein digestion.

Composition: Potassium Chloride, Sodium Chloride, Sodium Citrate, Acetic Acid, Benzoic Acid, Butyric Acid, Propionic Acid, Formic Acid, Lactic Acid, Malic Acid, Vitamin C, Protein Hydrolysate.

Description: WE-CID is designed according to digestive physiology of the poultry, such that effects of the acidifier for the poultry feed are provided at a maximum, electrolyte balance of the poultry under a heat stress condition can be maintained, and heat stress of the poultry can be released; and advantages of inorganic acids, organic acids and organic acid salts are completely utilized to carry out optimizing combination, such that utilization values of the product can be improved at a maximum, product fluxion property is good, and uniform mixing of the acidifier in the feed can be easily achieved.

Dosage for Poultry: 0.2MI. – 0.5 MI. per litre of water or as recommended by Veterinarian/ Nutritionist.

DIGESTION Capability BOOSTER

WE-CID

PROVEN ACIDIFIER COMBINED WITH ELECTROLYTE ACIDIFIER AND VITAMIN C

Benefits:

- Electrolyte balance during stressful conditions
- Enhance Immunity
- Increases feed intake, digestibility and absorption
- Revamp the intestinal epithelium integrity
- Reduces ammonia as well as nitrogen
- Control microbial proliferation
- Increase water intake
- Increases the phagocytic action of leucocytes
- Increases the absorption of Iron
- Increase the dressing percentage
- Excellent antioxidant
- Improves Egg shell quality.

Advantages:

- Less corrosive
- Completely bio-degradable
- Less stringent smell of acids
- No resistance
- User-friendly
- No withdrawal time

Presentation:

500ml./ 1ltr./ 5ltr./ 35ltr.

Storage Instruction:

Store in a cool, dry place away from light.

*Poultry feed Supplement not for Human Medical Use.

A Product of :

WE CARE ANIMAL HEALTH

9/12/1A222, Kotrung, GT Road, Ward No.: 05 West Bengal
